

## **Xen.org Project Mission Statement June 2009**

- **Build the industry standard open source hypervisor**
  - Core "engine" that is incorporated into multiple vendors' products
- **Maintain Xen's industry-leading performance**
  - Be first to exploit new hardware acceleration features
  - Help OS vendors paravirtualize their OSes
- **Maintain Xen's reputation for stability and quality**
  - Security must now be paramount
- **Support multiple CPU types; big and small systems**
  - From server to client to mobile phone
- **Foster innovation**
- **Drive interoperability**
